For (1), they may have done so already minus the "publicly" part - we just don't know. It would be nice of @Tesla to come clean on this matter.

Recall this Tesla service bulletin which may have been a safety recall in disguise.

**AR-622 Module Containment Rework Project** @. · Aug 14

12/ Now forward to October 2018. Tripp is fired and falsely accused of attempting mass murder. Tesla engineers still deal with the fallout from the damaged cell crisis (referred internally as AR-622 containment). But most interestingly, \$TSLA issues a TSB:

By the way, I commend both @tripp_martin and @KarlSa6892 for standing up to @Tesla but I would also understand if they took some money, signed an NDA and got on with their lives.
